CYBERSECURITY AWARENESS

a. Description

*This one-day awareness course is designed for all **employees and collaborators** who interact with digital tools in their daily work. The goal is to demystify cybersecurity, present the **major threats and risks** facing organizations today, and empower participants with concrete, practical knowledge to reduce vulnerabilities. Through clear **explanations**, **real-world examples**, and **actionable advice**, this session helps create a culture of shared responsibility around information security.*

b. Educational goals

- Understand the main cybersecurity threats and their impact
- Identify common attack techniques
- Recognize the importance of user behavior in preventing incidents
- Apply basic best practices in daily work
- React appropriately to potential security incidents
- Understand legal and organizational responsibilities

c. Prerequisites

None.

d. Targeted audience

- Employees at all levels: managers and team leaders, human resources, administrative staff…
- IT Support and technical teams
- Remote Workers or telecommuters

e. Program

Introduction to cybersecurity

- What is cybersecurity and why it matters
- Real-world examples of threats
- Importance of user behavior

Organizational roles & responsibilities

- Who does what in cybersecurity
- Shared responsibilities and interdepartmental cooperation
- Risk awareness and internal communication
